Program Switching Procedure for All models

- Start the engine
- Make sure security is unlocked in case security option is chosen
- Turn the Cruise **ON**
- Select the program slot using the appropriate cruise button specified above by watching for **CHK ENG MIL** in case of 996T and Gas Filler Cap **MIL** in case of other cars
- Turn the Ignition key **OFF**
- Wait 10 sec
- Turn the Ignition key **ON** (don't start the Engine here since **ECU** will reprogram with chosen program)
- Wait 10 sec. (**PSM** Error will appear on the Instrument Cluster)
- Cycle the Key again for 10 sec. (**PSM** error should be gone now)
- Start the Engine
